Allied Minds plc

Federated Wireless brings 4G/5G private networks to US enterprises with Microsoft Azure

Allied Minds plc (LSE: ALM), the IP commercialisation company focused on early stage technology businesses, announces that its portfolio company Federated Wireless ("Federated"), a pioneer in Citizen Band Radio Service (CBRS), has launched a new Connectivity-as-a-Service offering.

This end-to-end managed service provided by Federated includes discovery, planning, design, build, operation and support, enabling enterprises to reap the benefits of 5G with minimum risk and capital expenditure.

The new service offering was developed with specific attention to the needs of the cloud-native enterprises of today, who have come to depend on seamless integration between their own IT departments and global public clouds. Close collaboration with Azure has resulted in development and delivery of a service that these innovative IT organizations will see as a natural extension of their existing environment.

About Federated Wireless

Founded in 2012, Federated Wireless has long led the industry in development of shared spectrum CBRS capabilities, taking a lead role in the formation of the CBRS Alliance, being the first to complete a wide range of trials with its Spectrum Controller, and deploying the industry's first nationwide ESC network. The company's partner ecosystem includes more than 40 device manufacturers and edge partners, all of which are dedicated to collaboration to advance development and proliferation of CBRS services. Federated Wireless' customer base includes companies spanning the telecommunications, energy, hospitality, education, retail, office space, municipal and residential verticals, with use cases ranging from network densification and mobile offload to Private LTE and Industrial IoT.
